EDSCHA TRAILER SYSTEMS

– DAS ORIGINAL –

Sliding roofs for trucks have had one name since 1969: EDSCHA

Edscha Trailer Systems – the European market leader and inventor of the sliding roof for trucks is a byword for technological leadership in the field of sliding roofs worldwide.

Decades of engineering, know-how, continual optimisation, permanent quality assurance and expert customer service are the cornerstones of the Edscha TS quality promise. Whether curtain sider, full tarpaulin or sliding bow roof –

Edscha TS offers optimal solutions and the best price-performance ratio for all kinds of cargo carriers with tarpaulin covers. In addition to customised product solutions for truck and rail traffic Edscha TS is also your partner for individual challenges in all applications of sliding roof systems.

ACT LOCAL

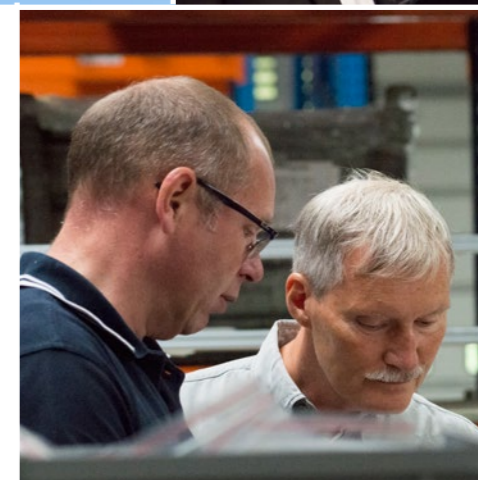

THINK GLOBAL

ning and management. Our products are manufactured in Kamenice in the Czech Republic under strict quality controls and are shipped from there on schedule to all over the world.

Constant, constructive communication between our employees ensures a smooth coordination of all organisational issues.

We develop and manufacture all Edscha TS products ourselves at our facilities in Moers (D) and Kamenice (CZ). We realise all processes from the initial product idea through construction of a prototype and serial production right up to the delivery and spare parts supply.

Research and development are at the forefront at our Headquarters in Moers alongside corporate strategic plan-

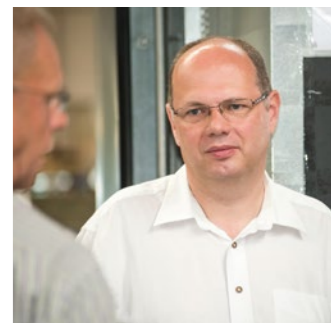

FORGING INNOVATION FOR

SLIDING ROOFS

Leading German engineering know-how for research and construction

Our innovation experts are at work at our headquarters in Germany. This is where experienced engineers and young developers with fresh new ideas work in permanent contact with customers and sales staff from diverse markets to develop our products to meet the current and future demands of our clients.

Short loading times, safety, operating comfort, material protection, fuel savings, weight reduction, volume utilisation, variability and durability are the typical Edscha innovation fields where new intelligent products and solutions or product optimisations are made.

Uncompromising continuous load and functionality tests, discussion of various solution variations, the best choice of material, determination of quality criteria and smooth integration in the manufacturing, storage and shipping process – it all begins here.

SECURED FOR THE FUTURE

Prototype construction and performance test in Moers

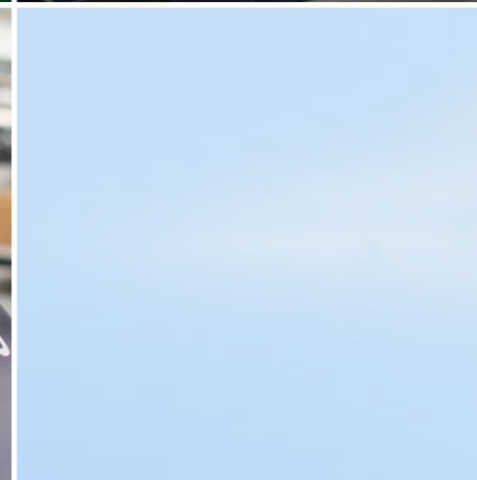

The products that are created virtually on paper and on the computer are tested immediately at EDSCHA TS on site for their practical suitability. Prototype construction in Moers, on the edge of the Ruhr district, ensures the perfect serial readiness of new products in close cooperation with our production experts in Kamenice.

PERFECT PRODUCTION

Manufacturing and logistics of all roof systems

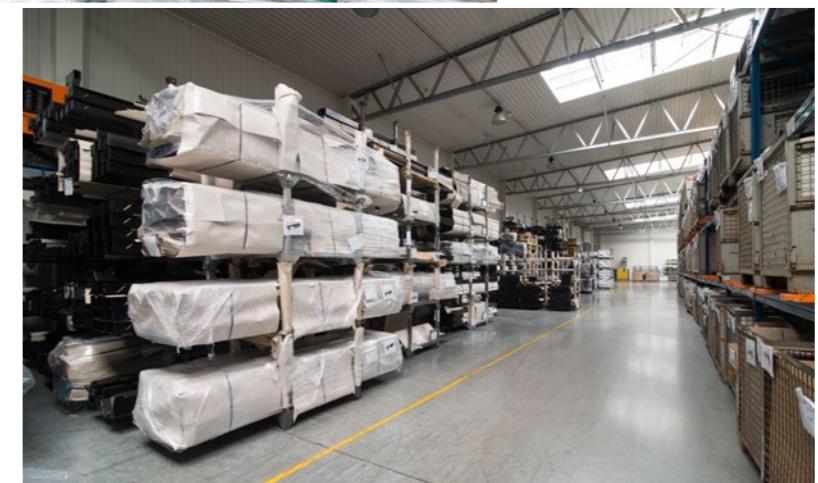

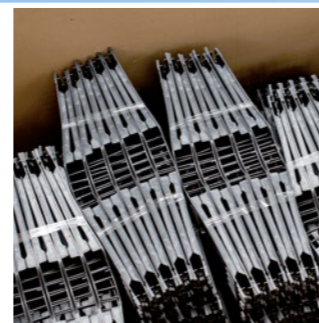

The production and assembly facility is located in Kamenice, near Prague in the Czech Republic, together with a central logistic centre of EUROPEAN TRAILER SYSTEMS. This is where the staff ensures the smooth manufacture, quality control, storage and shipping of the intelligent EDSCHA TS roof systems and the SESAM standard components.

FROM KAMENICE TO ALL AROUND THE WORLD

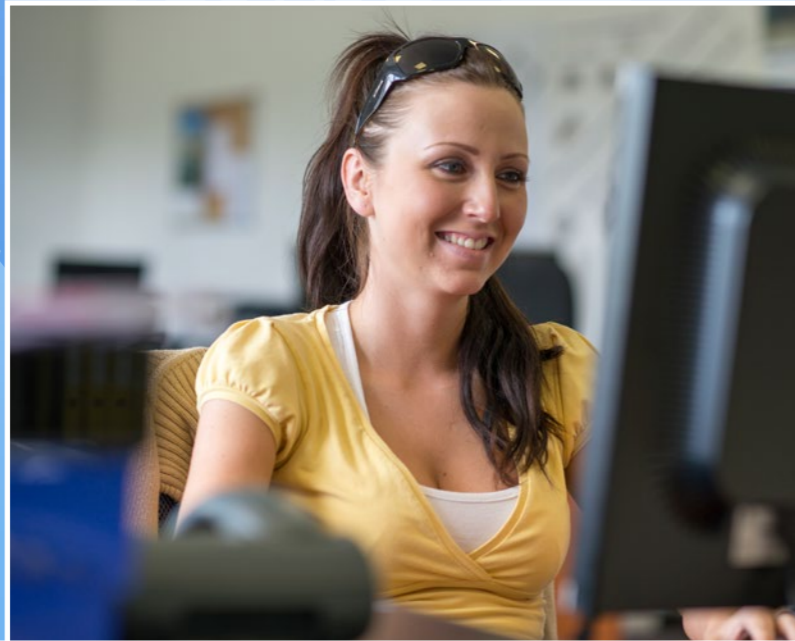

International high-speed supply from the Czech Republic

European Trailer Systems guarantees globally assured, fast and standardised product and spare parts supply for Edscha TS and Sesam. The new EDSCHA TS product generation with drastically reduced, modular component diversity

in further improved quality and full customisation offers our customers and regional trade partners even faster delivery times and thus also a reduction in their storage and inventory costs.

Our production and logistics specialists in Kamenice ensure permanent availability and fast order processing.

GLOBAL SERVICE GUARANTEED

Expert advice and individual service worldwide

Our continuously trained service staff ensure that EDSCHA TS customers receive optimum support anytime and anywhere, whether at our facilities or with our international distribution partners. This covers both individual advice on the combination of modular product components and support for ordering spare parts or direct on-site service.

We are constantly working to improve our services, understand the requirements of our customers even better, exceed their expectations where possible and always offer competent, fast and understandable solutions.
